

Scol - Bug #548

firefox unable to run scol voyager 6.5.1

11/10/2015 07:23 PM - hebdemnobad

Status:	Rejected	Start date:	11/10/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
when I enter the url for the posted web project, or whether I do local export and open 'index.html', firefox states: The Scol Voyager plugin is not detected, please download it and install from http://www.scolring.org/rsc/scol_plugin.exe , even though as of the date of this post, I'm running Version 6.5.1 and generating the scene with os3d 1.9.1. (I downloaded and installed 6.5.1, but it didn't change the behavior.) Perhaps I can mess with the firefox settings somehow?

I got the same problem :/

I think it's time to disable the web export for now until we get time to dig in emscriptem.

#2 - 11/10/2015 09:27 PM - iri

Like other web browsers, Firefox changed the plugins interface. Gradually, they were deprecated, then disabled and finally removed. Depending on the browser's version. I have not reviewed the new method (if any !!)
